

# Tech Academy

## HIRING STEM Summer Camp/Rec Assistants

Various Locations Around The Twin Cities

**\$12 – \$17 an hour**

### Job Description

We need enthusiastic, high-energy Summer Camp Technology Assistants.

Applicants for the Tech Academy Assistant Teaching position will support a lead teacher in a classroom setting. Assistants will be working with elementary-aged children encouraging students as they learn about technology. We have over 100 locations across the Twin Cities.

Assistants are expected to drive to their site, typically a school or community education building. You will need a vehicle to work at multiple locations around your home address. Locations will vary from week to week. Most assistants will work 5-8 weeks, 15 hours a week. We will try to schedule you to work within 10 miles of your home.

Classes will run from June 17th to August 16th and are typically scheduled Monday-Thursday with occasional Fridays. Applicants will need to be available from 8 a.m. to 5 p.m. Some classes are only in the morning or the afternoon, and sometimes both. There are 12+ hours of training to be held online and in-person at our Roseville office in June.

### About Tech Academy

Tech Academy teaches week-long technology classes throughout Minnesota. We partner with over 60 School Districts across the Metro Area. We offer classes in 3D Printing, Minecraft, Movie Making, Video Game Design, Legos, and Robotics for students ages 5-14.

### To Apply:

**Applicants MUST be at least 16 years of age to apply.**
